

## COMPLEXITY TO SIMPLICITY

- Having trouble with complicated process of identification, access control or issuing tickets?
- Hana Mobile NFC Solution will solve your troubles and enhance your business
- Increase your business productivity through our solution benefit

**Go and Touch**

HANA Mobile NFC Solution

# HANA NFC ADVANTAGES

## 1 "Go and Touch"

Reader-holders go and touch the cards as opposed to card-holders touch the reader and go.

## 2 Compact and Portable

Light-weight, handheld, battery powered, wireless

## 3 Easy System Implementation

All-in-one, compatible, expandable, customizable

## 4 HanaPac

Easy to migrate programs from device to device.

Provide PC-like programming environment.

High security ensures the safety of Sensitive data.

## What is NFC?

Near Field Communication or NFC, is a short-range high frequency contactless communication technology.

The technology is an extension of the ISO/IEC 14443 proximity-card standard (contactless card, RFID)
